Subject: Bristol Bay Watershed Assessment - Hydrological Modeling Meeting

Phil,

Regarding the September 27 – 29 Bristol Bay Fish Meeting: Based on our discussion late last week , I understand the State was invited to have a hydrologist with understanding/familiarity of the Bristol Bay Watershed attend just the Hydrologic Modeling meeting tomorrow afternoon. Unfortunately, there was a bit of a mix-up in the transmittal of that request to the State and we didn't become aware of the request until a late date. Because, the State hydrologist with the appropriate Bristol Bay experience is committed this week to water sampling in the Healy area that must be conducted before the end of the month, the State will not be able to have a hydrologist attend tomorrow's session. I believe that all of the State's hydrologic data has been made available to the EPA, so, hopefully, the lack of a State hydrologist will not detract significantly from tomorrow's session.

Best Regards,

Tom
